3. Cancer, Strokes and other malignant diseases
4. Reproductive health care
5. Injuries and wound
6. Infectious Diseases
7. Bee venom apipuncture therapies
8. Bee medicine for HIV/AIDS
9. TBC (Multidrug resistance)

## 10. Other Research on honeybee products

### **Important dates**

Abstract submission deadline: 15 August 2015

Notification of abstract acceptance: 17 September 2015

Full paper submission deadline (for the accepted abstracts): ... October 2015

### **Guideline of full paper for the authors of the accepted abstracts**

#### **General instructions**

1. The paper is original, has never been sent or published to any other seminars or publications
2. The full paper consists of: title, authors (without academic title), affiliation, corresponding author, abstract, key words, introduction (contains brief background and objective), methods, results and discussion, Conclusion (and recommendation, if any), acknowledgement (if necessary), and references
3. Formatted in MS-Word; written in English (checked for spelling and grammar before submission); paper size: A4, left margin 4 cm, right, top and bottom margin 3 cm; font times new roman (title 14 pt, author and affiliation 10 pt, body text 12 pt); maximum 15 pages with 1.5 spacing.
4. For title, abstract and key words format, please refers to the guidelines of abstract submission
5. Send to ..... With email subject: ICMUH2015-fullpaper-[*name*]

#### **Content page**

1. Introduction  
Contains brief background and research objective
2. Methods  
Contains study design, place and time; sampling (survey) or materials and tools (laboratory); data collection (survey), or research steps (laboratory); and data processing and analysis.
3. Results and Discussion  
Results contain main findings of the research. Maximum four tables and figures can be included. Title of the table is placed on top, while title of the figures is at the bottom. For diagrams or charts, use patterns instead of colors to differentiate among series. Discuss research results and give arguments by comparing the findings with theory/concept/findings from other researches. Discussion should be meaningful
4. Conclusion  
Contains answers to the research objectives. Recommendations may also be added, either implications for programs or advanced research that needs to be done based on the research findings or conclusions
5. Acknowledgement (optional)  
This section can be added to acknowledge donors, sponsors, or contributors of materials and research facilities. Names should be written without academic title.
6. References  
Use up-to-date references (should be from the last 10 years), write using Vancouver style (numbering)
